A WILSONART COMPANY

# About the Company

Technistone is one of the Wilsonart family of companies. Wilsonart is an American manufacturer and distributor of engineered surfaces, with a history that reaches back to 1956. At Technistone, we've been making engineered stone for more than thirty years. Our cutting-edge research and development department leads in the pursuit of innovation, and our wide network of branches and distributors facilitates exports to more than 60 countries.

Our production line in Hradec Králove in the Czech Republic is equipped with original Italian machines built by Breton. Our management's compliance with ISO 9001:2015 standards is regularly checked by the TÜV testing, inspection, and certification association. Technistone is also helping to shape the future of our industry as a member of AStA, the worldwide association of engineered stone manufacturers.

# About the Product

High durability, ease of maintenance, and attractive appearance have made engineered stone the material of choice for an increasing number of consumers worldwide. Our stone slabs are manufactured using natural quartz materials and coloured pigments that are bonded with polyester resin. In addition, we also use recycled glass and mirror shards in some products. Intense vibration, a vacuum, and high pressure during moulding and polishing help to achieve the non-porosity that distinguishes engineered stone from natural stone and gives it its high stain resistance.

■ Ambiente Light

The manufacturing process is subject to strict standards, applied to both raw material inputs and the final product. TechniStone® products are produced in large size slabs in several thicknesses, which have a wide range of applications in both the private and the commercial sectors.

# Certification

A list of all products with corresponding certificates can be inspected in the Origin database.

The Health Product Declaration Collaborative Protocol examines the chemical substances in a product and compares them with the hazardous substance list published by government and scientific institutions. The product does not contain any unauthorized chemicals.

Technistone's products have achieved UL's Greenguard Gold and SCS Global Services' Indoor Advantage certifications. That means they are free of any volatile organic compounds (VOCs) and do not emit any substances that can negatively influence the quality of the air indoors.

Many of Technistone's products contain more than a 20, 30, 40, and in some cases as much as a 70 percent share of recycled content.

TechniStone® complies with strict standards and procedures imposed by the National Sanitation Foundation and its products are safe for contact with food.

Use the QR code for more information about the specific product, certifications may differ.

## Finishes

# Maintenance

## General Recommendations

- ✓ For long-term maintenance of polished material, it is not advisable to regularly cut food or other products directly on the worktop. Use a cutting board.
- ✓ Do not place hot items (e.g. cast pots) directly on the counter top, always use an insulating pad.
- ✓ Use caution when using special knives and sharp objects.
- ✓ Use caution when handling dishes and other metal objects, especially at the edges or corners of the counter top.
- ✓ Do not allow these liquids to sit for prolonged periods (coffee, tea, wine, oil, etc.), remove them as soon as possible.
  
- ✗ Avoid splashing the counter top with strong cleaners for toilets, ovens, grills, stainless steel and hoods. These cleaners may contain substances that cause irreversible changes in the structure and color of the material (e.g. SAVO stainless steel cleaner, CIF hood cleaner).
- ✗ The surface of the product is not permanently resistant to strong acids and bases (hydrochloric acid, phosphoric acid, sodium hydroxide, potassium hydroxide, hydrogen peroxide) and does not even resist hydrofluoric acid for a short time. These substances can be contained in some detergents available on the market, so it is important to read the composition of the products and use only as recommended.
- ✗ TechniStone® products are designed for interiors and do not withstand prolong exposure to direct sunlight.

For more information, please refer to the supplier of the kitchen counter top or floor tiles and the manufacturer's website at [www.technistone.com](http://www.technistone.com), where all the documents and materials are available for our partners, including the General Business Terms and Cleaning Manual.

## Daily Use

For day-to-day maintenance, one of the following products can be used. These cleaning agents have a slight cleansing effect and serve primarily to degrease and remove common impurities on the kitchen counter. Always follow the manufacturer's recommendations and read the composition and use safety data sheets.

### FOR EVERYDAY CLEANING

COMPANY	NAME
Technistone	Orange Cleaner
Akemi	Quartz Clean and Care
Bellinzoni	B- REFRESH TOP
HG	HG natural stone kitchen top cleaner
Lasselsberger / Rako	CL 803, CL 804

### FOR EVERYDAY CLEANING OF TILES

COMPANY	NAME
Technistone	Orange Cleaner
Akemi	Crystal Clean
Bellinzoni	B-LEM 3 EXXTRA
HG	HG streak free
Lasselsberger / Rako	CL 803, CL 804
Lihofin	MN Easy-Care Cleaner

## Special Products

For resilient stains (i.e. oil, rust, cement, adhesives), we recommend the following products in particular. These cleaners are mostly based on moderate acids and alkalis, therefore use caution when applying, minimize action time, dilute the product, and rinse thoroughly with water after application.

Before each use of the selected detergent, we recommend that you test it on a small area. Always follow the manufacturer's recommendations, read the composition and use safety data sheets. After using detergents, the surface of the product should always be thoroughly washed with clean water.

### FOR INTENSIVE CLEANING

STAINS	COMPANY	NAME
Grease	Fila	NoSpot

## Treatment, Sealing, Impregnation

Special products are also available on the market that, when used per the manufacturer's recommendation, will offer increased protection against staining (impregnation from wax-based products). These treatments are typically water-based and are available with and without color intensifier additives.

Always read the manufacturer's recommendations to ensure you understand their intended use and composition (dilution ratio's, safety data sheets, etc). The use of these impregnating products are especially recommended for special finishes (i.e. honed, textured, etc) and for high traffic surfaces (kitchens, bars, shops).

The impregnating product will need to be reapplied over time depending on the frequency the surface is used. Always apply the impregnator agent to a clean, dry surface using a microfiber cloth. After application, remove any excess sealing agent and buff gently with a clean microfiber cloth to remove any remaining residue. Follow manufacturer's recommendation for use immediately following the application.

10-year  
warranty

# Warranty

## Validity

Technistone offers a **ten-year** warranty on material used in an interior. This warranty does not cover material used in commercial premises, for which there is a five-year warranty.

The **five-year** warranty covers slabs installed in areas accessible to the public, beginning with the date of installation.

The Technistone company offers a **two-year** warranty on floor tiles.

The warranty must be activated by registering your TechniStone® product on the company's website under the section "Warranty" (or scan the QR code below).

The warranty starts the day that the fabricated slabs are installed by a licensed fabricator in the interior living space. Registration must be completed within 30 days of said installation.

The seller is obligated to provide and abide by the warranty information presented to the customer throughout the warranty period, in accordance with these warranty terms.

More about  
Warranty

To process the claim and ensure quick quality service, contact the location where the original TechniStone® slab was purchased.

Provide quality photo documentation of the defects claimed.

During warranty service, the product must be available to the designated Technistone representative to perform a visual inspection and the customer must follow the representative's given instructions.

In the event that a slab replacement is decided, the processing, reinstallation, and associated costs will not be covered by the warranty issued by TechniStone®.

Technistone reserves the right, in agreement with the customer, to replace the defective slab with a new color in the current product offer, which is regularly updated due to development and market requirements.
